Subject: Re: Barges

The situation at Emsworth Lock and Dam, Mile 6 Ohio river had to do with a combination of high water, and ice movement breaking 27 barges out of Jacks Run, Mile 2 Ohio River. We had a 2 week spell of sub freezing weather that froze many sections of the Monongahela, Allegheny, and Ohio Rivers. We then had a couple days of warm weather and rain that melted the snow thus causing all the tributaries to overflow into the three rivers. There is much ice on the Allegheny River that is of some concern.

Best Regards,

David J Podurgiel

Subject: First Energy/DOE meeting in Akron, OH

Thanks for your assistance in working on setting up a meeting with DOE Angelos Kokkinos, Director Office of Advanced Fossil Technology Systems in our Clean Coal program office; Doug Matheney, Special Advisor to the Secretary for Fossil Energy, and Assistant Secretary of Fossil Energy Steve Winberg with Mike Dowling.

(b) (6)

Then if Mr. Dowling has time on 2/1 in the morning we can have them come to his office to meet before leaving for DC.

(b) (6)

You can reach me and Shannon as needed via email or the phone number below if you have any questions. I'll be in touch tomorrow to finalize this meeting.

Thanks.

Carol Loman
